Services offered

RENTAL AND SERVICE Planning and realization of technological installations, video, lighting and audio setup for national and international events like conferences, product presentations, fashion shows, congresses, opening ceremonies.

SYSTEM INTEGRATOR Design and setup of integrated multimedia systems for meeting rooms, congress halls, museum areas, theaters and spaces dedicated to communication.

INNOVATION TECHNOLOGY Augmented and virtual reality, interactive technologies and multiplatform app development: tailored solutions to the ever-changing needs of the market.

In this area we include:

DIGITAL ROOM a space with permanent technical set-up created to provide an easily accessible service to stream your event.

VIRTUAL ROOM a virtual space built in 3D, completely customizable and adaptable to every need for live streaming events with links to external speakers in high quality.

ADHOC is a native app that allows you to view the customer's product on tablets and large screens at very high resolution, effectively highlighting details and particular mechanisms through interactive enlargements and slow motion shots.

DEVENTA is a native web app based on cutting-edge technologies. It allows you to get in touch with customers and collaborators quickly and easily; allows you to broadcast events online in live streaming, carry out 1to1 videoconferences, create webinars and virtual fairs, it is also possible to interact with your customers through the assistance Chat, the Q&A module and verify accesses and visits to content through timely reports and customized graphics . All included in a simple and intuitive layout.
